
INDEX AI CONFERENCE

Date : Feb 20, 2018 - 09:00 AM

Event URL : <http://www.sfbayeventslist.com/events/index-ai-conference-feb-2018>

Organizer : IBM

Venue :

Location : Location: Moscone Convention Center San Francisco, 747 Howard St
San Francisco, CA, US, ZIP: 94103

Index is a first-of-its-kind, developer-focused event that will center around the code and communities that are changing technology. Index was designed for one purpose: to spend three days giving you all the skills and knowledge you'll need to survive the next 365. We're working with technical experts from Amazon Web Services, GoDaddy, Pivotal, Spotify, and a bunch of other companies and user communities to craft a conference that helps you get your hands on the latest technologies you've heard about, but haven't had the time to explore. Sign up today to gain technical education from industry experts, learn the latest software development practices, build your network, and advance your career.

Students can register free.

Faculty/developers can register free for full event with this code: Free Code/Full Pass:
IND18FULL

2000 open source developers expected

Feb 20-22 San Francisco: <http://service-science.info/archives/4827>
(free code Feb 20 Google - IBM Session: CD1TENSF)

As a bonus, IBM will be showing off a quantum computer - and we have an open source kit for students to learn to program a quantum computer.

Steve Jobs and Wozniak had a computer club in early Silicon Valley, and we see this event the next step in open source companies. For example, MENDIX is an open source development tool for smart application development - see: <https://www.mendix.com/>

AI is the future, and the software is available on Github today! [http://service-
